

# TALS's Alternative Constructivist Workshops

## TALS Education Program – Annapolis MD

**Begins April 10 – May 15**

**6-Weekly Sessions/10am-1pm**

**Cost: \$140**

**Science Workshop Component (1pm-2:15pm)**

**Cost: \$48**

### Challenge Yourself 10:00 am – 1:00 pm

Children will work both independently and collaboratively using a fun, multi-sensory, emergent curriculum philosophy to support their confidence, strengths, and evolving knowledge. While objectives will be in place, children will become an integral part of the learning, with the emphasis on the process and not the product.

The day will begin with an individual or group initiative. Preferably, an outdoor low-rope confidence course type activity. Each initiative offering a different "challenge" to overcome. We will then go inside for our weekly challenge, where participants can choose to work together or individually using provided resources to address the challenge. We will be utilizing many different types of construction mediums such as Lego's (Robotics), Kinects and other various miscellaneous materials to accomplish tasks.

### Science Exploration 1:00 – 2:15

This add on class is for children and parents that want a bit more. Each session we will offer a new science experiment to challenge curiosity and raise awareness of some amazing actions and reactions that can happen every day when we mix things together. This is a "hands on" science class.

10:00am - 10:15	Arrival/Overview
10:15am - 10:45	Group/Individual Challenge or Initiative
10:45am - 11:30	Construction Challenge
11:30am - 11:50	Lunch
11:50am - 12:45	Construction Challenge
12:45pm - 1:00	Discussion/ Challenge Review
1:00pm - 1:15	Dismissal/Free Time
1:15pm - 2:15	Science Exploration/Investigations
